

Complete Summary

TITLE

Acute otitis externa (AOE): percentage of patient visits for those patients aged 2 years and older with a diagnosis of AOE with assessment for auricular or periauricular pain.

SOURCE(S)

American Academy of Otolaryngology - Head and Neck Surgery Foundation, Physician Consortium for Performance Improvement®. Acute otitis externa (AOE)/otitis media with effusion (OME) physician performance measurement set. Chicago (IL): American Medical Association (AMA); 2007 Mar. 12 p. [2 references]

Does not apply to this measure

Brief Abstract

DESCRIPTION

This measure is used to assess the percentage of patient visits for those patients aged 2 years and older with a diagnosis of acute otitis externa (AOE) with assessment for auricular or periauricular pain.

RATIONALE

"Pain relief is a major goal in the management of acute otitis externa (AOE). Frequent use of analgesics is often necessary to permit patients to achieve comfort, rest, and to resume normal activities. Ongoing assessment of the severity of discomfort is essential for proper management." (American Academy of Otolaryngology - Head and Neck Surgery Foundation [AAO-HNSF], 2006)*

*The following clinical recommendation statements are quoted verbatim from the referenced clinical guidelines and represent the evidence base for the measure:

The management of diffuse AOE should include an assessment of pain. The clinician should recommend analgesic treatment based on the severity of pain. (AAO-HNSF)

PRIMARY CLINICAL COMPONENT

Acute otitis externa (AOE); assessment for auricular or periauricular pain

DENOMINATOR DESCRIPTION

All patient visits for those patients aged 2 years and older with a diagnosis of acute otitis externa (AOE) (see the related "Denominator Inclusions/Exclusions" field in the Complete Summary)

NUMERATOR DESCRIPTION

Patient visits with assessment for auricular or periauricular pain

Evidence Supporting the Measure

EVIDENCE SUPPORTING THE CRITERION OF QUALITY

- A clinical practice guideline or other peer-reviewed synthesis of the clinical evidence

NATIONAL GUIDELINE CLEARINGHOUSE LINK

- [Clinical practice guideline: acute otitis externa.](#)

DESCRIPTION OF CASE FINDING

All patient visits for those patients aged 2 years and older with a diagnosis of acute otitis externa (AOE)

DENOMINATOR SAMPLING FRAME

Patients associated with provider

DENOMINATOR INCLUSIONS/EXCLUSIONS

Inclusions

All patient visits for those patients aged 2 years and older with a diagnosis of acute otitis externa (AOE)

Exclusions

Documentation of medical reason(s) for not assessing auricular or periauricular pain

RELATIONSHIP OF DENOMINATOR TO NUMERATOR

All cases in the denominator are equally eligible to appear in the numerator

DENOMINATOR (INDEX) EVENT

Clinical Condition
Encounter

DENOMINATOR TIME WINDOW

Time window is a single point in time

NUMERATOR INCLUSIONS/EXCLUSIONS

Inclusions

Patient visits with assessment for auricular or periauricular pain

Exclusions

None

MEASURE RESULTS UNDER CONTROL OF HEALTH CARE PROFESSIONALS, ORGANIZATIONS AND/OR POLICYMAKERS

The measure results are somewhat or substantially under the control of the health care professionals, organizations and/or policymakers to whom the measure applies.
